## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gesuita et al (US # 6,566,613 B1) in view of Luke (US # 6,580,037 B1) and applicant's own admission of prior art. See *In re Nomiya*, 509 F.2d 566, 184 USPQ 607,611 (CCPA 1975); and, MPEP § 2129. Gesuita et al discloses a scale which can be controlled or assisted remotely via the Internet from a personal computer (Col. 4, lines 8-35; Col. 9, lines 30-58; Col. 10, lines 38-58). Gesuita et al state that they have a graphic user interface that includes icons, but they stop short of suggesting a "web user interface" for their display. However, it is noted from applicant's specification that the software they use is conventional, off-the-shelf software -- the invention apparently lies in the way that the conventional software is being used. Since applicant has admitted that the web page interface software that he is using is conventional, and since it appears that the scale of Gesuita et al was intended to work equally well with any commercially available web based interface, it would have been obvious to the ordinary practitioner to use any conventional web based interface in the scale of Gesuita et al motivated by its art recognized suitability for its intended use. See *Sinclair & Carroll*

*Co. v. Interchemical Corp.*, 325 U.S. 327, 65 USPQ 297 (1945); *In re Leshin*, 227 F.2d 197, 125 USPQ 416 (CCPA 1960); *Ryco, Inc. v. Ag-Bag Corp.*, 857 F.2d 1418, 8 USPQ2d 1323 (Fed. Cir. 1988); and, MPEP §§ 2144.06 & 2144.07.

Gesuita et al suggest the idea of remote assistance, but stop short of suggesting having a remote technician log onto the scale controller as stated by claims 24-33. However, the examiner notes that this type of remote troubleshooting of a network based computer from another remote computer (I.E.: the "help desk") has been known in general for at least a decade, and the reference to Luke expressly suggests using this type of remote servicing for computerized scales (Col. 3, lines 16-68). It would have been obvious to the ordinary practitioner to use conventional remote access and remote assistance software in the device of Gesuita et al motivated by its art recognized suitability for its intended use. See MPEP §§ 2144.03 & 2144.07.

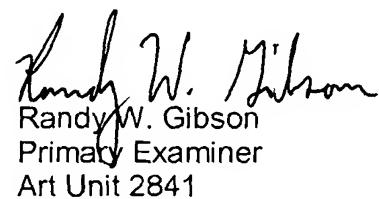

The preamble recitation that the scale is intended to determine a price for an item has not been given patentable weight. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

***Conclusion***

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Randy W. Gibson whose telephone number is (703) 308-1765. The examiner can normally be reached on Mon-Fri., 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David S Martin can be reached on (703) 308-3121. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-7722.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-5115.
